

# Practice management software built for private healthcare.

One connected platform – from patient records and scheduling to billing and communication, built on 25 years of experience across the UK & Ireland.

# Simplifying Practice. Amplifying Care.

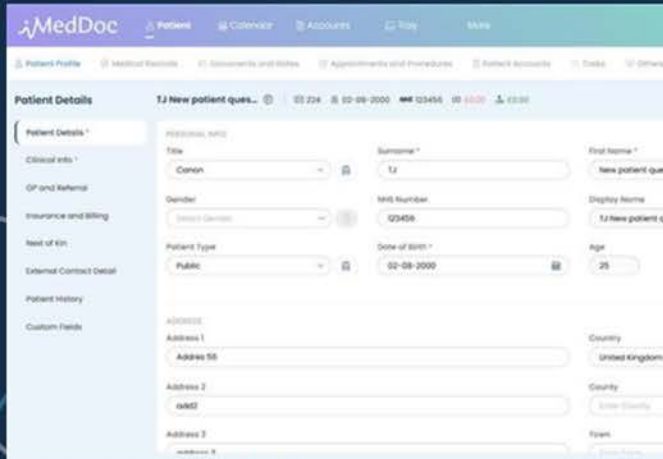

## Built for Real Clinics

iMedDoc is a complete practice management platform that brings patient records, scheduling, billing, reporting, and video consultations together in one secure system. Spend less time on admin and more time delivering exceptional care.

## Everything in One Place

Powered by Lanas, with over 25 years of experience supporting clinics across the UK & Ireland, iMedDoc helps practices operate efficiently, reduce errors, and work with confidence.

# What makes iMedDoc different?

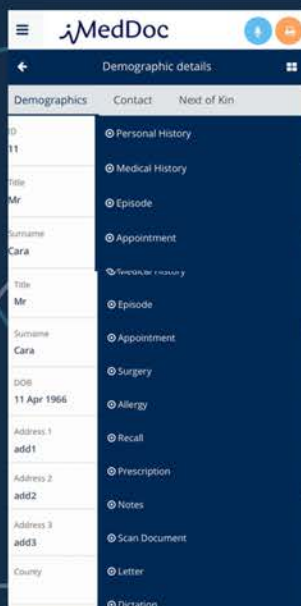

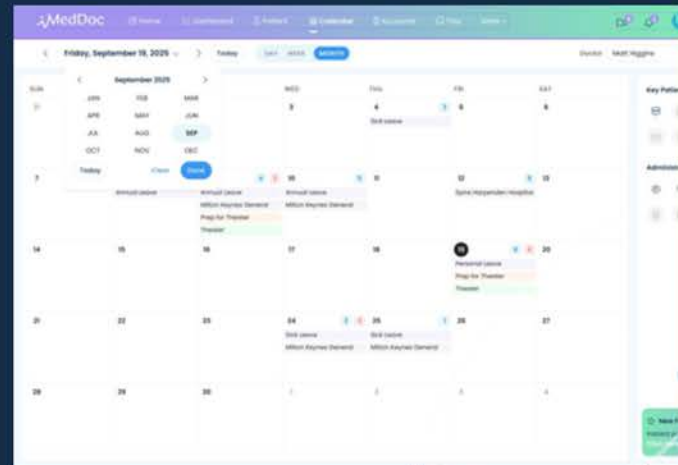

## Workflow

Our features work together seamlessly, saving you time. Everything has its place and works as you would expect, optimising your workflows.

## Flexibility

Colour-coded diaries, clinician filtering, and flexible views make even complex schedules easy to manage.

## Mobile app

Access patient records, schedules, notes and dictations on the go – including capturing and uploading images from your device.

# All the features you need in one place

## Mobile Application

Your Practice, Right in Your Pocket

## Reporting & Analytics

Build a better business clinically and commercially

## Dynamic Diaries

Plan to perfection with our detailed diaries

## Video Consultation

Empower your patients to book and pay online

## Billing & Payments

Manages invoices, payments, and integrations in one dashboard

## Digital Dictation

Built in dictation on desktop and mobile

## Medical records

Labs, prescriptions, and medical notes

## Security & Privacy

Top class security giving you peace of mind

## Mobile Application

Your Practice, Right in Your Pocket

Take your practice with you. Our app gives full access to key desktop features, including:

- Patient lists
- Clinic/theatre lists
- SOAP notes
- Medication histories
- Scanned documents
- Image uploads and dictations

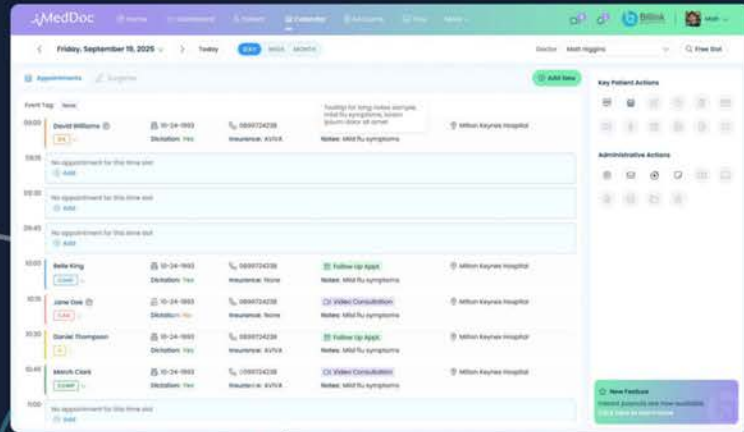

Available on both android and iOS mobile and tablet devices.

## Dynamic Diaries

A flexible, visual calendar built for real clinic workflows.

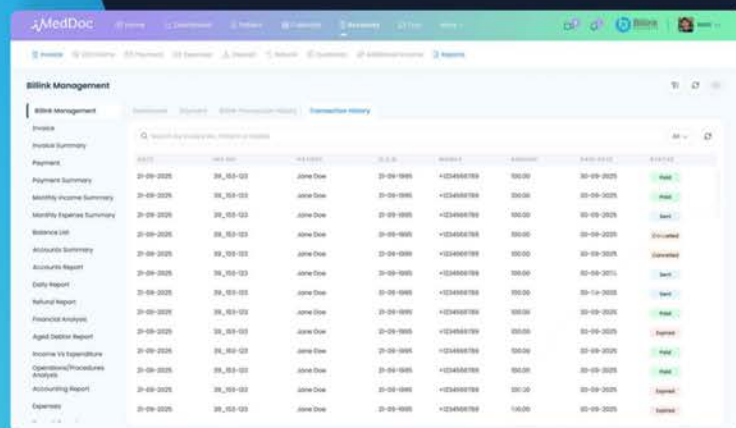

Easily manage and view multiple schedules:

- Compare schedules with other consultants or staff
- Coordinate workloads
- Spot appointment availability faster

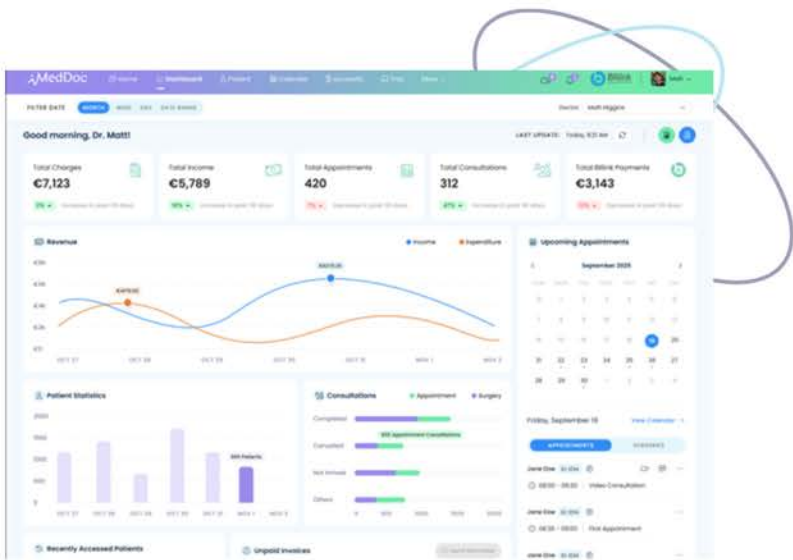

## Billing and Payments

Invoices, online payments and outstanding balances in one place.

Manage all payments and invoices efficiently:

- Create invoices and take payments
- Track balances and reduce overdue invoices with analytics
- View full patient payment history
- Securely log all transactions

## Reporting & Analytics

Make Smarter Decisions with Real-Time Insights

Gain clear insights into your practice:

- Track financial performance with the accounting module
- Build and customize reports across patient records
- Search and filter by demographics and treatments received

## Video Consultation

Bring Care Closer to Your Patients

Connect with patients anytime, anywhere:

- Offer convenient video consultations from any device
- Make healthcare more accessible and flexible
- Automated appointment links keep patients informed and on time

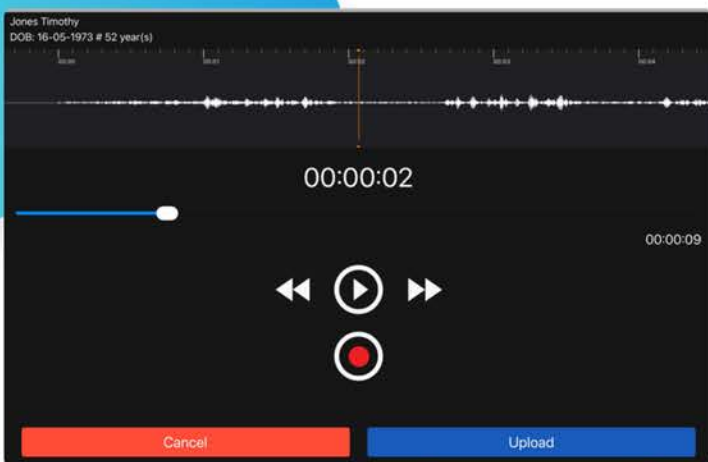

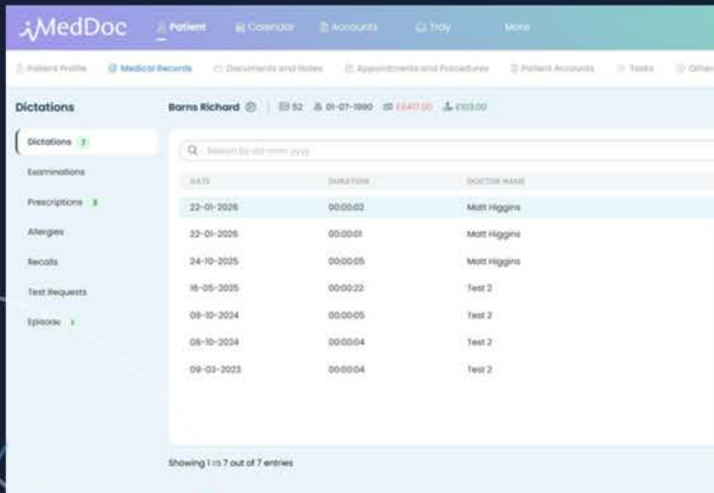

## Digital Dictation

Faster, Accurate Notes from Anywhere

Streamline your documentation on the go:

- Dictate letters and patient notes anytime via our mobile app
- Upload directly for fast, accurate transcription
- Benefit from 98%+ accuracy with advanced Dictate IT technology

## Medical records

Protect Patient Data with Confidence

Simplify your practice management:

- Access a cloud-based EMR system anytime, anywhere
- Maximise efficiency and ensure accurate patient data
- Manage scheduling, records, accounts, and claims in one place
- Keep patient information secure with top-level data protection

## Security & Privacy

Protect Patient Data with Confidence

Keep your data safe and secure:

- Store all patient and practice information in AWS-backed cloud data centres
- Centralised, GDPR-compliant storage with controlled access
- Eliminate concerns over confidential data on local desktops
- Rely on expert monitoring and protection of your sensitive information

## Dr Ronan Kavanagh

Consultant, Western  
Rheumatology

### Payments That Pay Off

"Communication across the practice has improved significantly thanks to messaging and task features. Billink integration makes collecting smaller patient payments so easy that iMedDoc is now cost-neutral."

## Jillia Williams

Medical Secretary

### Simpler Workflow, Happier Patients

"iMedDoc is quick and easy to use. The ability to email multiple documents at once ensures patients and GP surgeries get everything they need in one go. Invoicing is seamless, sent directly to patients, making accounts more efficient and reducing late payment chasing."
